

## CAD Pro

### Problem statement:

1. It will be an on-spot designing round. Participants will be given a problem statement at the time of event and they have to submit their design in the specified time limit.
2. Each Question will carry some points according to the type of question and its level of difficulty.
3. Models can be prepared in any CAD software (CATIA/Pro E/AutoCad/Solidworks/Solidedge) and the final file must be prepared in IGES or STEP format. Bring your own laptops with necessary softwares installed.

### Judging Criteria:

1. Any sign of plagiarism from internet or from other participant will lead to direct disqualification.
2. Participant can only submit once. In case of multiple submissions only the first entry will be considered for evaluation.

*Register at  
[www.elan.org.in](http://www.elan.org.in)*

3. The design will be evaluated on the following aspects :
  - A. Originality of the Design
  - B. Clear and easily comprehensible design
  - C. Time Taken
4. Certificate of Merit and Prizes will be given for the top two teams.
5. Participation Certificate will be given for those who registered online and participated in the event.
6. Participation Certificate is not guaranteed for those who registered on spot for the event.
7. Disqualified teams will not be considered for any certificates.
